Dr.

Dear Doctor:

We are trying to locate a patient of yours by the name of _____ in order to do a follow-up study on treatment he received for a sarcoma in July, 1947.

We are especially interested in cases of this sort, and his is of particular interest since he has this unusual malignant tumor and has shown such a long survival time.

If he is able and willing we would like him to participate in a metabolism study at Strong Memorial Hospital in Rochester, New York for about ten days. Please assure him it would only be for observation and collection of excreta.

We will take care of his transportation and hospital costs, and he will receive about \$140.00 participation reimbursement for cooperating in this study. If it is necessary for him to have someone accompany him, we will take care of the transportation and lodging of that individual and allow them \$13.00 a day for meals and other incidental expenses.

If Mr. _____ is unable to come at this time, please advise us of his condition and convey to him our interest.

Faithfully yours,

Austin M. Brues, M.D.
